AI7 HEALTH SYSTEMS The Next-Gen Healthcare Operating Platform

MEDI7 : The Conversational Hospital Operating System

Built by **AI7** • The world's first **100% paperless**, **WhatsApp-native** hospital OS with an integrated **Multimodal AI Clinical Copilot** for modern multispecialty hospitals.

Zero Paper from Token to Discharge

WhatsApp-First (No Patient App)

NEW: Multimodal AI PDF Report Reader

Marathi • Kannada • Hindi • English

Prepared by: **AI7 Executive Leadership Team** • Architecture: **FastAPI + PostgreSQL + Gemini 2.0 + WhatsApp** • Compliance: **DPDP Act 2023 & ABDM Ready**

THE REALITY IN TIER-2/3 INDIA

70,000+ HOSPITALS AT RISK

The Paperwork Paralysis & Clinical Blind Spots

Hospitals in emerging markets are drowning in manual clipboards, lost laboratory slips, and frantic 3-minute consultations.

For Doctors: Chronic Charting Overload

- **30% of OPD consultation time** wasted deciphering messy handwriting and organizing crinkled external lab sheets.
- **No longitudinal history:** Patients forget previous visits, prescriptions, and baseline creatinine or HbA1c values.
- **High Diagnostic Hazard:** Subtle out-of-range biomarkers buried in 4-page diagnostic PDFs get overlooked during 3-minute rushes.
- **Medicolegal Exposure:** Paper files get misplaced, leaving doctors vulnerable without verifiable audit logs.

For Hospital Owners & Investors: Severe Revenue Leaks

- **Crippling Stationery Overhead:** Average 50-bed hospital burns **₹60,000 - ₹1,20,000 / month** on letterheads, thermal rolls, and toner.
- **78% Follow-Up Drop-Off:** Patients lose paper follow-up slips; hospital loses recurring outpatient revenue.
- **Pharmacy & Lab Leakage:** Unconnected systems lead to unbilled tests, unaccounted drug dispense, and inventory theft.
- **Failed Patient Apps:** 92% of patients refuse to download or register on hospital-specific mobile apps.

THE SOLUTION | FULL-STACK DIGITAL SPINE BY AI7

MEDI7: Zero Paper, Real-Time AI, 100% Connected

An end-to-end hospital operating system replacing paper clipboards with synchronized conversational workflows.

Seamless Synchronized Patient Journey

1. **Reception**
   30-sec Registration & WhatsApp Welcome
2. **Doctor OPD**
   AI 3-Line Briefing + Voice/Click Rx
3. **Diagnostics / Lab**
   AI PDF Reader & Abnormals Flagging
4. **Pharmacy**
   Direct Rx Dispensing & Auto-Inventory
5. **Patient Loop**
   WhatsApp Letterhead PDF + UPI Bill

Authentic Legal Prescriptions

Generates pixel-perfect digital letterheads identical to official medical stationery, compliant with MCI & NMC guidelines.

Vernacular WhatsApp Engine

Reaches patients where they are. Instant automated notifications in Marathi, Kannada, Hindi, and English. No app downloads needed.

DPDP Act 2023 Compliant

Every staff action, diagnosis entry, and medicine dispense is logged with IP, Staff ID, and cryptographic timestamp in audit trails.

MAJOR NEW AI7 INNOVATION | MULTIMODAL CLINICAL INTELLIGENCE

AI PDF Report Analyzer & Doctor Copilot

Harnessing Google Gemini 2.0 Vision to digest any external lab, radiology, or discharge summary PDF — flagging anomalies and generating clinical suggestions in seconds.

The Diagnostic Problem Solved

Patients constantly bring physical papers or WhatsApp PDFs from hundreds of unintegrated third-party diagnostic labs, ultrasound clinics, and prior hospital visits.

- ✓ **No manual re-typing:** System ingests PDF scans, multi-page tables, and handwritten annotations automatically.
- ✓ **Universal Compatibility:** Works across Thyrocare, Lal Pathlabs, Metropolis, or local clinic letterheads.
- ✓ **Sub-2-Second Processing:** Results ready before the patient sits on the examination stool.

How the Multimodal Pipeline Works

STEP 1 **Multimodal Extraction:** Ingests document pixels + text layers; extracts test names, measured values, units, and age/gender specific reference intervals.

STEP 2 **Longitudinal Context Fusion:** Correlates new lab findings with the patient's existing EHR history (e.g. chronic hypertension, active medications, previous creatinine levels).

STEP 3 **Clinical Decision Support (CDS):** Generates targeted differential suggestions, drug contraindication alerts, and recommended follow-up tests.

STEP 4 **Human-in-the-Loop Integration:** Doctor reviews the suggestion and adds it to the prescription with a single tap. Doctor retains 100% autonomy.

THYROCARE TECHNOLOGIES LTD — CENTRAL DIAGNOSTIC REF LAB
NABL & CAP ACCREDITED CLINICAL REFERENCE LABORATORY

Report ID: LAB-2026-8901
Date: 14-Oct-2026

Patient: Ramesh Patil **Age/Sex:** 58 Yrs / Male **Hospital UID:** AI7-2026-00412

INVESTIGATION PARAMETER	OBSERVED VALUE	BIOLOGICAL REFERENCE RANGE
HbA1c (Glycosylated Hemoglobin)	10.4 %	4.0 - 5.6 %
Fasting Blood Sugar (FBS)	218 mg/dL	70 - 99 mg/dL
Serum Creatinine	2.8 mg/dL	0.7 - 1.3 mg/dL
Blood Urea Nitrogen (BUN)	48 mg/dL	7 - 20 mg/dL
eGFR (CKD-EPI)	24 mL/min/1.73m²	> 90 mL/min
Urine Microalbumin	180 mg/L	< 20 mg/L
Hemoglobin (Hb)	8.9 g/dL	13.0 - 17.0 g/dL
Serum Potassium	5.3 mEq/L	3.5 - 5.0 mEq/L

AI7 Gemini Clinical Copilot — Real-time CDS Active

EXTRACTED BIOMARKERS & RISK STRATIFICATION

Serum Creatinine: 2.8 mg/dL	Estimated GFR: 24 mL/min (Stage 4)
HbA1c: 10.4 % (Uncontrolled)	Hemoglobin: 8.9 g/dL (Anemia)

CRITICAL DRUG CONTRAINDICATION & CKD ALERT

Patient's eGFR has dropped to 24 mL/min/1.73m² (Stage 4 Severe CKD). Patient is currently prescribed **Metformin 1000mg BD**. Metformin is strictly contraindicated at eGFR < 30 mL/min due to life-threatening Lactic Acidosis risk.

1. Immediate cessation of Metformin; switch to renal-adjusted DPP-4i (Teneligliptin 20mg) or Basal Insulin.
2. Workup for Anemia of Chronic Kidney Disease (Serum Ferritin, Transferrin Saturation, consider Erythropoietin).
3. Immediate Nephrology referral for fistula planning & renal progression slowdown.
4. Review Telmisartan dosage in setting of borderline hyperkalemia (K+ 5.3 mEq/L).

1-Click Adopt into Doctor's Prescription

CLINICIAN EXPERIENCE | BURNOUT REDUCTION

Built for Busy Clinicians: 3-Minute Consultations

Cuts administrative keyboard fatigue while elevating diagnostic thoroughness and patient trust.

3-Line AI Patient History Briefing

Before opening the physical case sheet, the doctor reads an instant synthesis of the patient's entire medical journey:

> "58M with 12-year history of poorly controlled T2D and HTN. Last visit (3 weeks ago) presented with bilateral pedal edema. Serum Creatinine jumped from 1.3 to 2.8 mg/dL; currently on Metformin + Telmisartan."

Regional Voice AI Scribe

Clinicians can speak naturally in mixed languages (e.g. English + Marathi or Kannada). Whisper + Gemini converts dictation directly into structured prescriptions:

> Doctor says: *"Tab Glycomet stop kara, Pantop D subha khali pet 5 divas, urine routine ani KFT test krava."*
> **➔ Automatically mapped to dosage frequencies, generic alternatives, and lab order requisitions!**

Rapid Drug Auto-Complete

Pre-built hospital formulary with 1-click dosage timing chips (1-0-1, After food, 5 days) eliminates repetitive typing.

Automated Drug Interaction Checks

Cross-checks prescribed molecules against patient allergies and active kidney/liver biomarkers to prevent adverse events.

Total Medicolegal Protection

Every prescription generated has doctor credentials, registration number, patient UID, and cryptographic audit log protection.

PATIENT EXPERIENCE | NO APPS TO DOWNLOAD

WhatsApp-First: 99.4% Delivery in Native Languages

Indian patients already trust and use WhatsApp daily. MEDI7 turns WhatsApp into their personal lifelong health locker.

Instant Digital Prescription

As soon as the doctor clicks Save, the prescription PDF is formatted on official hospital letterhead and delivered to the patient's WhatsApp before they step into the corridor.

ZERO LOST PAPER SLIPS

Instant Diagnostic Reports

Patients don't need to wait in crowded hospital corridors for physical lab reports. When the lab verifies the results, the report PDF arrives automatically on WhatsApp.

45 MIN PATIENT WAIT SAVED

Automated Multilingual Reminders

24 hours before a scheduled follow-up, the patient receives a friendly reminder in their mother tongue (Marathi, Kannada, Hindi). Patients reply "YES" to confirm.

+64% FOLLOW-UP RETENTION

Live WhatsApp Message Samples (4 Languages)

OPERATIONAL BREADTH | HOSPITAL-WIDE INTEGRATION

The Complete 6-Role Integrated Hospital Ecosystem

Every department operates on tailored, role-specific interfaces with strict role-based access control.

1. Receptionist

Registers walk-in or emergency patients in under 30 seconds. Issues OPD queue tokens, assigns consulting doctors, and triggers instant WhatsApp welcome cards.

2. Consulting Doctor

Live OPD queue with waiting times. 3-line AI patient briefing, voice/tap e-prescription, integrated lab and radiology order requisition.

3. Lab Technician (AI)

Tracks phlebotomy sample collection. Uploads diagnostic PDFs; **Gemini AI automatically parses parameters** and flags abnormals for the doctor.

4. Radiologist

Receives scan orders (X-Ray, Ultrasound, CT). Attaches imaging studies, records structured radiological impressions, and dispatches to doctors.

5. Pharmacist

Direct digital prescription lookup by Patient ID. Eliminates handwriting guesswork. Instant inventory stock decrement with low-stock alerts.

6. Hospital Owner / Admin

Executive command dashboard showing live patient footfalls, doctor workload distribution, daily revenue, pharmacy margins, and staff audit logs.

ENTERPRISE TECH STACK | SECURITY & COMPLIANCE

Engineered for High-Concurrency & Zero Data Loss

A resilient microservices-ready architecture designed for 99.99% hospital uptime on modern open-source foundations.

High-Performance Technology Stack

FastAPI (Python 3.11)
Asynchronous, high-throughput REST APIs with automatic OpenAPI/Swagger documentation.

PostgreSQL 16 + SQLAlchemy
Strict ACID compliance, indexed medical records, relational integrity across 10 tables.

Google Gemini 2.0 Flash
Multimodal vision for PDF parsing, medical report extraction, and vernacular language generation.

Redis 7 + Celery Workers
Asynchronous background queue for instant PDF generation and high-volume WhatsApp dispatch.

Security & DPDP 2023

- ✓ **Role-Based Access Control (RBAC):** Receptionists cannot see clinical notes; doctors only see their assigned queues.
- ✓ **Immutable Audit Trails:** Timestamped IP + Staff ID logged on every mutation.
- ✓ **Air-Gapped Option:** Deployable on hospital on-premise local servers for zero cloud dependency.

MARKET POSITIONING UNFAIR ADVANTAGE

Why MEDI7 by AI7 Wins Over Legacy Hospital Systems

Traditional enterprise software fails in Tier-2/3 hospitals because of painful 6-month rollouts and mandatory patient app downloads.

Feature / Capability	Legacy HIMS (Cerner / Epic)	Traditional Indian HIMS (Practo / KareXpert)	MEDI7 by AI7
Patient Mobile Requirement	Proprietary Portal App (Failed Adoption)	Dedicated App Download Required	**Zero App — 100% Native WhatsApp**
Multimodal AI PDF Report Analyzer	None / Third-party bolt-on ($$$)	None — Manual Lab Entry Only	**Native Gemini 2.0 Multimodal CDS**
Deployment Timeframe	6 to 12 Months	3 to 6 Weeks	**Under 48 Hours**
Regional Languages	English Only	Limited English / Hindi	**Marathi, Kannada, Hindi & English**
Total Cost of Ownership	₹25L+ upfront + hefty maintenance	₹40,000 - ₹80,000 / month	**₹15,000 - ₹35,000 / mo (Immediate ROI)**

The WhatsApp Habit Moat

Patients and staff already have WhatsApp on their phones. We eliminate the 90% drop-off barrier caused by requiring patient portal logins.

Multimodal AI Defensibility

Trained on real Indian diagnostic report layouts, handwriting quirks, and vernacular dialects that generic Western medical AI cannot handle.

48-Hour Viral Onboarding

Dockerized microservices and zero-hardware design let any hospital go completely paperless over a single weekend.

EVOLUTION PATH | EXECUTION TIMELINE

Product & Clinical Roadmap: 2026 – 2027

From single-hospital paperless workflows to an AI-orchestrated federated health intelligence network.

PHASE 1 (COMPLETE) — LIVE IN PROD

The Paperless Core

- ✓ 6 Role-based Dashboards (Doctor, Lab, Pharmacy, etc.)
- ✓ Multilingual WhatsApp delivery (4 languages)
- ✓ Pixel-perfect digital letterheads
- ✓ Full audit logging & RBAC security

PHASE 2 (CURRENT) — IN ROLLOUT

AI Diagnostics & Copilot

- ✓ **Multimodal AI PDF Report Analyzer**
- ✓ Clinical Decision Support & Differential Alerts
- ✓ AI Voice Scribe in regional Indian dialects
- ✓ Instant UPI payment collection on WhatsApp

PHASE 3 (NEXT 12 MOS) — FORWARD VISION

Predictive Hospital Network

- → **ICU Early Warning System (EWS):** Vital sign trajectory deterioration alerts for sepsis/shock.
- → **ABDM M3 Integration:** Interoperable National Ayushman Bharat digital health IDs.
- → Federated Multi-Hospital Group analytics.

Strategic Growth Flywheel

Every hospital deployed strengthens AI7's proprietary regional clinical datasets, boosting AI extraction accuracy and creating an unassailable data moat in Tier-2/3 Indian healthcare.

TRACTION & VALIDATION | PROVEN IN ACTIVE HOSPITAL DEPLOYMENTS

Real-World Impact Across AI7 Partner Hospitals

Demonstrating tangible clinical efficiency, zero paper reliance, and high doctor satisfaction in active daily operations.

Dr
Dr. Priya Sharma, MD
Chief Medical Officer, Partner Multispecialty Hospital Network

"Having the AI7 engine automatically read external 4-page lab PDFs and flag out-of-range creatinine and troponins in seconds has been a lifesaver in crowded OPD hours. I no longer waste 5 minutes searching through crumpled files."

AD
Chief Operating Officer
120-Bed Multispecialty Hospital Group

"Our stationery bills dropped by over ₹80,000 in the first month alone, but more importantly, our follow-up visit return rate jumped by 60% because patients actually receive automated reminders right on their WhatsApp."

NEXT STEPS

JOIN THE HEALTHCARE REVOLUTION

Partner with AI7: Transforming Hospital Care with MEDI7

Whether you are an investor backing India's digital health infrastructure or a clinician seeking an intelligent paperless hospital.

For Investors: Seed Expansion Round

Raising Seed capital to scale MEDI7 across **150+ multispecialty hospitals** in Karnataka, Maharashtra, and Andhra Pradesh:

- ✓ **Market Penetration:** Direct hospital acquisition playbook with 48-hour onboarding.
- ✓ **AI Moat Acceleration:** Multimodal clinical report extraction across 30+ regional diagnostic lab formats.
- ✓ **Unit Economics:** Proven 28-day payback period and >80% recurring gross margins.

DECK & FINANCIAL PROJECTIONS AVAILABLE UPON REQUEST

For Doctors: 14-Day Zero-Risk Pilot

Bring MEDI7 into your hospital or clinical department with **zero hardware investment** and zero operational downtime:

- ✓ **Live in 48 Hours:** We digitize your existing letterhead and formulary over the weekend.
- ✓ **Zero Staff Learning Curve:** Reception and nursing staff trained in 30 minutes.
- ✓ **Guaranteed Paper Reduction:** Save ₹40,000+ in printing in your first month alone.
